Skills

Blockchain	Ethereum, EVM, Bitcoin, Hyperledger
Decentralized Application tools	Smart contracts, ReMix, MetaMask, Mist, Truffle
Enterprise Java Application Servers	WebSphere Liberty 18.x, WebSphere Traditional 9.x/8.x, WebLogic 11g, Tomcat, CQ
Web Servers	Apache 2.2
Databases	Oracle 12c/11g
Operating Systems	Linux (RHEL, Ubuntu), Unix
Security frameworks	Identity Federation (SAML2)
Web development tools	Eclipse
Cloud Computing	Amazon Web Services
DevOps	GIT, <i>UrbanCode</i> Deploy
Design methodologies & Patterns	UML
Programming languages	Java, Python, C, Solidity, Perl, Bash, awk

Experience

- Infrastructure Architect Sr., PNC Financial Services Jun 2011 – Sep 2018
 - Provided the subject matter expertise in the application server platforms; including WebSphere, WebLogic (Oracle Fusion Middleware), and Tomcat platforms.
 - Developed automation for deployments of the application servers and the supporting interfaces.
 - Provided engineering support for the application server and supporting platforms.
 - Developed automation for standalone containers such as Adobe CQ, test automation product (CA Lisa), and UrbanCode Deploy.
 - Provided proof of concepts for new products, features, and security remediations.
 - Certified the hosted features and versions.
 - Provided guidance in troubleshooting J2EE platforms.
 - Developed automation for patching, and license product implementation.
- Distributed Architect / AVP, BNY Mellon Sep 2010 – May 2011
 - Implemented Identity Federation using CA Federation Manager.
 - Provided proof of technologies for various use-cases.
 - Collaborated with development teams in implementing use-cases for various federation scenarios.
- Software Engineer Lead, PNC Financial Services Jan 2006 – Sep 2010
 - Developed tools for automation of integration services, and configuration of application servers.
 - Developed tools for deployment of web applications on WebSphere application servers for cluster configurations and cell setups.
 - Development using JMX for controlling WebSphere components.
 - Automation scripts for setting up IBM web content management system.
- Senior Systems Engineer, SAIC Apr 2004 – Nov 2005
 - Developed J2EE components on the Weblogic application server platform using struts framework

- Configured a clustered environment for Oracle mid-tier environments.
- Consultant, BearingPoint Inc. 2002 – Apr 2004
 - Worked as a Java and Oracle consultant at DFAS.
- Consulting role, CEI
 - Developed online and batch processes for Eli Lilly & Company to publish and subscribe personnel and organizational data, mostly using Oracle stored procedures.
 - Developed a batch application tool for Mellon Bank to upload bulk data to an LDAP Directory Server. The tool was used to parse text data to generate LDIF script for LDAP.
 - Developed and supported a multithreaded batch interface in C for Alcoa, for loading financial data into Oracle GL Applications.
 - Developed a program as part of the Y2K remediation effort for Alcoa, to reverse engineer and document programs using C, ksh and awk.
- Engineer, Intergraph (India).
 - Involved in the development and support of an application for emergency fire, medical and police services.
- Engineer, CMC Corporation.
 - Involved in the development of common codebase of database inventory application for Defense ordnance factories.
 - Technical lead for the development of an application used to monitor the dredging operations. Computations and graphics were implemented in C language, X-Windows based Graphics Kernel System.

Certifications

- [Blockchain Specialization](#), University at Buffalo & The State University of New York S2019

Coursework

- Blockchain Platforms, University at Buffalo, SUNY (Coursera) S2019
- Decentralized Applications, University at Buffalo, SUNY (Coursera) S2019
- Smart Contracts, University at Buffalo, SUNY (Coursera) S2019
- Blockchain Basics, University at Buffalo, SUNY (Coursera) S2019
- Virtual Machines internals (JVM), CSCI E-98, Harvard Extension School F2016
- Fundamentals of website development, CSCI E-12, Harvard Extension School S2016
- Cloud Computing, CSCI E-90, Harvard Extension School F2015
- Network Architecture and Protocol, CSCI E-40, Harvard Extension School F2014

Education

- M.Tech., Indian Institute of Technology, Kharagpur
- B.Tech., Jawaharlal Nehru Technological University, Kakinada
- Middle, Junior, and High School, Sainik School, Korukonda
